Business	Acquisition	Specialized	Desktop	

Description:

The Test Incident Report Parser and Sorter (TIRPS) analyzes and extracts text files containing TIRs for Microsoft Excel or other spreadsheet program imports. TIRPS software processes data reported on on DA Form 7492, and can be modified to extract data from similar forms as required.

TIRPS 1.x is a desktop application. The user manually enters data into TIRPS which can be exported into an Excel spreadsheet. This application does not transmit or receive data. TIRPS operates on an Army Golden Master (AGM) compatible platform.

Restrictions:

POC: netcom.hq.networthiness@mail.mil /(520)538-1199

This Certificate of Networthiness is based on a trusted standardized platform, configured per FDCC. All patches and updates will be provided by the host network administrator (NEC or DECC) in accordance with all technical directives, mandates, and IAVM. This Certificate of Networthiness is no longer valid should the assessed configuration be significantly altered. Per Army Cyber Command guidance, all operating environment will implement HBSS capabilities. Upon expiration of this Certificate of Networthiness, this application must be reassessed to ensure it is still compliant with the GNEC architecture and is still networthy. Should this software version be upgraded prior to this expiration, the new version must be evaluated for networthiness.
